IN THE MATTER OF THE REQUEST FOR AGENCY ACTION OF NEWFIELD PRODUCTION COMPANY FOR AN ORDER MODIFYING THE BOARD'S ORDERS ENTERED IN CAUSE NOS. 131-51 AND 139-90 TO ESTABLISH SPECIAL 1280-ACRE (OR SUBSTANTIAL EQUIVALENT) DRILLING UNITS FOR THE PRODUCTION OF OIL, GAS AND ASSOCIATED HYDROCARBONS FROM THE UPPER WASATCH FORMATION, COMPRISED OF SECTIONS 3 AND 10, T3S, R2W, USM, AND SECTIONS 3 AND 10 AND 15 AND 22, T3S, R3W, USM, RESPECTIVELY, DUCHESNE COUNTY, UTAH, AND TO ALLOW, ON A PILOT BASIS, THE DRILLING AND PRODUCTION OF UP TO FOUR (4) HORIZONTAL WELLS ON EACH SUCH SPECIAL DRILLING UNIT SO ESTABLISHED

**FINDINGS OF FACT,
CONCLUSIONS OF LAW AND
ORDER**

Docket No. 2013-028

Cause No. 139-110

This Cause came on for hearing before the Utah Board of Oil, Gas and Mining (the "Board") on Wednesday, October 23, 2013, at approximately 1:45 p.m., in the Auditorium of the Utah Department of Natural Resources Building in Salt Lake City. The following Board members were present and participated at the hearing: Chairman Ruland J. Gill, Jr., Kelly L. Payne, Carl F. Kendell and Michael R. Brown. Board Members Chris D. Hansen and Susan S. Davis were unable to attend. The Board was represented by Michael S. Johnson, Esq., Assistant Attorney General.

Testifying on behalf of Petitioner Newfield Production Company ("Newfield") were Roxann Eveland – Land Lead, Brice A. Caldes – Geologist, and Mike Jensen –

Engineering Advisor. Said witnesses were recognized by the Board as experts in petroleum land management, geology and petroleum engineering, respectively, for purposes of this Cause. Frederick M. MacDonald, Esq., of and for MacDonald & Miller Mineral Legal Services, PLLC, appeared as attorney for Newfield.

The Division of Oil, Gas and Mining (the "Division") filed a Staff Memorandum on October 17, 2013 addressing the issues of off-drilling unit surface locations for horizontal wells requiring exception location consent and clarification of additional conditions insuring protection of correlative rights. Steven F. Alder, Esq., Assistant Attorney General, appeared as attorney for the Division. Mr. Alder, at the conclusion of Newfield's presentation in chief, made a statement expressing the Division's support for the granting of Newfield's Request for Agency Action dated September 5, 2013 (the "Request"), as conformed to the testimony and other evidence provided at the hearing, expressly conditioned upon the stipulation by Newfield to include, with each application for permit to drill ("APD") for any authorized horizontal well with an off-drilling unit location, a self-certification that it has obtained proper surface and subsurface authorization for such a location from the owners and that Newfield will cement and case the wellbore to the point of the authorized setbacks set forth below.

Jerry Kenczka, Assistant Field Manager for Lands and Minerals, Vernal District Office of the United States Bureau of Land Management ("BLM"), acting in its trust

capacity on behalf of the Ute Indian Tribe and Indian Allottees and as advisor to the Bureau of Indian Affairs, Uintah & Ouray Agency (“BIA”), filed a Letter on October 21, 2013 expressing the BLM’s support for the granting of the Request. However, no BLM representative made an appearance at the hearing.

LaVonne Garrison, Associate Director – Oil & Gas, of the Utah School and Institutional Trust Lands Administration (“TLA”), appeared and made a statement expressing the TLA’s support for the granting of the Request.

No other party filed a response to the Request and no other party appeared or participated at the hearing.

The Board, having considered the testimony presented and the exhibits received into evidence at the hearing, being fully advised, and for good cause, hereby makes the following findings of fact, conclusions of law and order in this Cause.

FINDINGS OF FACT

1. Newfield is a Texas corporation with its principal place of business for Rocky Mountain operations in Denver, Colorado. Newfield is duly qualified to conduct business in the State of Utah, and is fully and appropriately bonded with all relevant Federal, Indian and State of Utah agencies.

2. By Order entered on October 27, 1983 in Cause No. 131-51 (the “131-51 Order”), the Board established sectional (640-acre or substantial equivalent) drilling units

for the production of oil, gas and associated hydrocarbons from the Lower Green River and Wasatch formations, defined as follows:

that interval below the stratigraphic equivalent of 9,600 feet depth in the "E" Log of the Carter #2 Bluebell well located in the SW $\frac{1}{4}$ NW $\frac{1}{4}$, Section 3, Township 1 South, Range 2 West, U.S.M. (which equivalence is the depth 9,530 feet of the SP curve, Dual Induction Log, run March 15, 1968, in the Chevron #1 Blanchard Well located in the NW $\frac{1}{4}$ SE $\frac{1}{4}$ of said curve, Dual Induction Log, run March 15, 1968, in the Chevron #1 Blanchard Well located in the NW $\frac{1}{4}$ SE $\frac{1}{4}$ of said [Section 3]), to the base of the Green River-Wasatch formations,

for numerous lands in the south-central portion of the greater Altamont-Bluebell field, including subject Sections 3 and 10 of Township 3 South, Range 2 West. Under the original 131-51 Order, only one well may produce on each such unit so established, which must be located no closer than 1,320 feet from the exterior boundary of any governmental section; provided, that an exception to said 1,320-foot limitation may be granted administratively without a hearing where a topographical exception is deemed necessary.

3. By Order entered on May 9, 2012 in Cause No. 139-90 (the "139-90 Order"), the Board first extended its Order entered on September 20, 1972 in Cause No. 139-8 (the "139-8 Order") to numerous lands within the area Newfield refers to as the "Central Basin" area which were previously unspaced, including subject Sections 3, 10,

15 and 22 of Township 3 South, Range 3 West, to create sectional (640-acre) drilling units for Lower Green River-Wasatch production, defined in the 139-8 Order as follows:

the interval from the top of the Lower Green River formation (TGR₃ marker) to the base of the Green River-Wasatch formations (top of Cretaceous), which base is defined as the stratigraphic equivalent of the Dual Induction Log depths of 16,720 feet in the Shell-Ute 1-18B5 well located in the S½NE¼ of Section 18, Township 2 South, Range 5 West, U.S.M., and 16,970 feet in the Shell-Brotherson 1-11B4 well located in the S½NE¼ of Section 11, Township 2 South, Range 4 West, U.S.M.,

and second to modify the 139-8 and 131-51 Orders to allow up to four (4) producing Lower Green River-Wasatch formation wells, whether all vertical, all horizontal, or a combination of both, upon the drilling units, to be drilled at the option of the operator and with the operator's full discretion as to the development of the hydrocarbon reserves, provided each well shall not be closer than 1,320 feet from an existing unit well completed in and producing from the formation and no closer than 660 feet from the drilling unit boundary. The Board also expressly eliminated any first well siting requirements under the original 139-8 and 131-51 Orders.

4. Sections 3 and 10 of Township 3 South, Range 2 West, and Sections 3, 10, 15 and 22 of Township 3 South, Range 3 West, Duchesne County, Utah, are collectively hereinafter referred to as the "Subject Lands."

5. The oil, gas and associated hydrocarbons underlying the Subject Lands as relevant to the Upper Wasatch formation are owned as follows:

Sections 3 and 10, T3S, R2W – Tribal, State of Utah (TLA administered) and fee;

Sections 3 and 10, T3S, R3W – Tribal, Allotted and fee; and

Sections 15 and 22, T3S, R3W – Tribal, Allotted, State of Utah (Division of Forestry, Fire and State Lands (“DFFSL”) administered) and fee.

Newfield owns the majority of the working interest/operating rights in each two sectional pairing, all as more particularly outlined on Exhibit “D” admitted into evidence.

6. There currently are no producing wells located on the Subject Lands. APD’s relating to the following wells to be located on the Subject Lands have been approved by the Division in accordance with the 139-90 Order, but have not yet been spud:

<u>Well</u>	<u>Location</u>	<u>Division APD Approval</u>
McKinnon 4-15-3-3WH	<u>T3S, R3W, USM</u> SHL – Sec. 15: NW ¹ / ₄ NW ¹ / ₄ CSL – Sec. 15: NW ¹ / ₄ NW ¹ / ₄ Term. – Sec. 15: SW ¹ / ₄ SW ¹ / ₄	2/25/13
Albert 11-22-3-3W	<u>T3S, R3W, USM</u> Sec. 22: NE ¹ / ₄ SW ¹ / ₄	11/26/12
Francisco 1-22-3-3WH	<u>T3S, R3W, USM</u> SHL – Sec. 22: NE ¹ / ₄ NE ¹ / ₄ CSL – Sec. 22: NE ¹ / ₄ NE ¹ / ₄ Term. – Sec. 22: SE ¹ / ₄ SE ¹ / ₄	4/11/13

In addition, the following APD's have been filed with, but not yet approved, by the Division:

<u>Well</u>	<u>Location</u>	<u>Filing Date</u>
Dart 15-10-3-2WH	<u>T3S, R2W, USM</u> SHL – Sec. 10: SW $\frac{1}{4}$ SE $\frac{1}{4}$ CSL – Sec. 10: SW $\frac{1}{4}$ SE $\frac{1}{4}$ Term. – Sec. 10: NW $\frac{1}{4}$ NE $\frac{1}{4}$	7/12/13
Ranch 16-10-3-2WH	<u>T3S, R2W, USM</u> SHL – Sec. 10: SE $\frac{1}{4}$ SE $\frac{1}{4}$ CSL – Sec. 10: SE $\frac{1}{4}$ SE $\frac{1}{4}$ Term. – Sec. 10: NW $\frac{1}{4}$ NW $\frac{1}{4}$	7/12/13

Newfield has represented that it intends to withdraw its approved APD's for the Albert 11-22-3-3W and Francisco 1-22-3-3WH Wells, to sundry its submitted APD's for the Dart 15-10-3-2WH and Ranch 16-10-3-2WH Wells to "long (1280 acre)" horizontals to produce only from the Uteland Butte Member of the Lower Green River formation, and to sundry the approved APD for the McKinnon 4-15-3-3WH Well to a "long (1280 acre)" horizontal to produce from the Upper Wasatch formation pursuant to this Order.

7. In the Central Basin area, the Upper Wasatch is a 1,000 – 1,400 foot thick interval of interbedded lacustrine carbonate, shale and discontinuous sandstone. It is defined for purposes of this Cause as follows:

the stratigraphic equivalent of the interval from 8,765 feet to 9,967 feet MD as identified in the Dual Induction Log run on March 7, 1972 in the JW Accawinna # 1 Well located in the NE $\frac{1}{4}$ SW $\frac{1}{4}$ of Section 13, T3S, R3W, USM.

Carbonate markers within the Upper Wasatch can be correlated across the Central Basin, but the lacustrine sand bodies are highly discontinuous and can be challenging to target with a vertical well program. Within the Central Basin, the Upper Wasatch also maintains an overprint of fracturing that, when accessed, provides production enhancements.

8. The Upper Wasatch is an attractive horizontal candidate when utilizing hydraulic fracture enhancement as it communicates across stratigraphic complexity and effectively accesses the existing thru-going fracture networks. A horizontal lateral will encounter and access several distinct reservoirs that could not be accessed in widely-spaced vertical well bores.

9. The exhibits admitted into evidence and testimony received reflect that: (a) shale/lime/silt barriers between the Upper Wasatch and other productive intervals of the Lower Green River and/or Wasatch formations, and in particular the Uteland Butte Member of the Lower Green River formation, should eliminate or at least minimize the potential for fracture migration and communication between them; and (b) Gas-Oil and Water-Oil ratios from “short” (640 acre) lateral horizontal wells producing from the Upper Wasatch reflect separate and distinct characteristics from those drilled and producing from the Uteland Butte Member of the Green River formation. The Upper Wasatch therefore appears to be a separate and distinct “common source of supply” of

oil, gas and associated hydrocarbons than other portions of the Lower Green River-Wasatch formations.

10. There are at least two separate and distinct potentially productive intervals within the Upper Wasatch, designated by Newfield as the “Wasatch 15” and “Wasatch 28” and as reflected on Exhibit “H” admitted into evidence, which justify multiple stacked horizontal well placement.

11. Recent micro-seismic studies conducted by Newfield, summarized in Exhibit “J” admitted into evidence and the testimony received relating thereto, demonstrated both limited effective fracture height vertically and length laterally. The limited vertical effective fracture suggests there will be inefficient drainage vertically through the Upper Wasatch average thickness of approximately 1,200 feet in the proposed pilot areas. This supports both the need for up to four (4) horizontal wells per drilling unit to more adequately recover resources and 660 foot lateral and 200 foot vertical inter-well setbacks within each such drilling unit.

12. Technology has advanced such that “long” laterals of up to 9,240 feet in length may be efficiently and economically drilled. Allowing such laterals will allow up to an additional 1,320 feet of Upper Wasatch contact and reduce the number of wells and associated surface disturbance resulting from the limitations currently established under the 139-90 Order.

13. The exhibits admitted into evidence and testimony received reflect an estimated ultimate recovery (“EUR”) for a “long” lateral Upper Wasatch horizontal well of 896 MBO, compared to an EUR of 375 MBO for a “short” lateral Upper Wasatch horizontal well. The economics of a “short” lateral well appears to be marginal (11% rate of return) whereas the economics of a “long” lateral well indicate a better yield (32% rate of return).

14. The exhibits admitted into evidence and testimony received indicate that four Upper Wasatch wells should drain approximately 960 acres, therefore further supporting a four long lateral horizontal well density per drilling unit.

15. Newfield has stipulated it will maintain 660-foot setbacks from each drilling unit boundary which, based on the exhibits admitted into evidence and testimony received, will protect the correlative rights of the owners in the lands adjacent to the drilling units.

16. As a consequence, Newfield desires to conduct a pilot program establishing special 1,280-acre (or substantial equivalent) drilling units for the Upper Wasatch as defined in Findings of Fact No. 7 above comprised of the following respective Subject Lands:

Township 3 South, Range 2 West, USM

Sections 3 and 10: All

Township 3 South, Range 3 West, USM

Sections 3 and 10: All

Sections 15 and 22: All,

to confirm these initial findings, with the authorization, on a pilot basis, the drilling and production of up to four (4) long lateral horizontal wells on each such special drilling unit so established; provided, however, that:

- a) no producing interval of the authorized horizontal lateral may be located closer than 660 feet to any boundary of the special drilling unit, and no closer than 660 feet laterally or 200 feet vertically to another horizontal lateral within said special drilling unit without obtaining an exception location approval in accordance with Utah Admin. Code Rule R649-3-3;
- b) the surface location of the authorized horizontal well not only may be located anywhere on the special drilling unit, but may also be located off the special drilling unit presuming proper surface and sub-surface authorization for such a location has been obtained from the owners, and the well will be cemented and cased to the 660-foot drilling unit setback within the special drilling unit as set forth in (a) above, both to be evidenced and satisfied by a self-certification to such effect executed by the operator of said special drilling unit and filed with the Division, and the other set backs for the wells set forth in (a) above are maintained;
- c) any horizontal well so drilled may not be plugged back or recompleted to produce from any other formation other than the Upper Wasatch, as defined in Findings of Fact No. 7 above, and no existing or new vertical wells located upon the Subject Lands may be perforated or completed to produce from the Upper Wasatch as defined in Findings of Fact No. 7 above, without further authorization from the Board; and
- d) within a reasonable time after analysis of the pilot program results, but in any event, not more than two years after entry of the Order, Newfield (or

its successor operator) shall report back to the Board on the results of the program.

In addition, Newfield has requested that the 131-51 Order, as modified by the 139-90 Order, and the 139-90 Order itself remain in full force and effect as to all formations underlying the Subject Lands covered thereby except the Upper Wasatch, including the right to drill up to four (4) wells, whether all vertical, all horizontal, or a combination of both, on each drilling unit so established to produce from said formations subject to the same limitations set forth in the 139-90 Order. The terms requested are fair, reasonable and justified under the circumstances.

17. This is an extension of an Upper Wasatch long lateral horizontal pilot program which the Board previously authorized in Cause No. 139-103 with essentially the same terms and conditions. The extension is therefore fair, just and consistent under the circumstances.

18. A copy of the Request was mailed, postage pre-paid, certified with return receipt requested, and properly addressed to all mineral, leasehold and production interest owners in the Subject Lands, and to the TLA, DFFSL, the BIA and the Vernal Field Office of the BLM. The mailings were sent to said parties at their last addresses disclosed by the relevant TLA, BIA and Duchesne County realty records.

19. Notice of the filing of the Request and of the hearing thereon was duly published in the Uintah Basin Standard on October 1, 2013 and in the Salt Lake Tribune and the Deseret Morning News on October 6, 2013.

20. The vote of the Board members present and participating in the hearing on this Cause was unanimous (4-0) in favor of granting the Request.

CONCLUSIONS OF LAW

1. Due and regular notice of the time, place and purpose of the hearing was properly given to all parties whose legally protected interests are affected by the Request in the form and manner as required by law and the rules and regulations of the Board and Division.

2. The Board has jurisdiction over all matters covered by the Request and all interested parties therein, and has the power and authority to render the order herein set forth pursuant to Utah Code Ann. §§ 40-6-5(3)(b) and 40-6-6.

3. The Upper Wasatch, as defined in Findings of Fact No. 7 above and as underlying the Subject Lands, constitutes a “common source of supply” as that phrase is defined in Utah Code Ann. § 40-6-2(19).

4. Up to four (4) “long” (up to 9,240 feet in length) lateral horizontal wells are required to efficiently and economically drain each proposed 1,280-acre special drilling

unit. However, based on data generated from the pilot wells, further in-fill drilling may be required at a later date.

5. Creation of the three (3) 1,280-acre special drilling units for Upper Wasatch production on a pilot basis, and with the provisos outlined in Findings of Fact No. 16 above, is fair, reasonable and justified under the circumstances.

6. An order establishing the special drilling units is required to allow conforming communitization as relating to the authorized horizontal wells in accordance with Federal regulations, guidelines and practice and to protect correlative rights.

7. The relief granted hereby will result in consistent and orderly development and the greatest recovery of oil, gas and associated hydrocarbons from the Upper Wasatch, as defined in Findings of Fact No. 7 above and underlying the Subject Lands, prevent waste and adequately protect the correlative rights of all affected parties.

8. Newfield has sustained its burden of proof, demonstrated good cause, and satisfied all legal requirements for the granting of the Request.

ORDER

Based upon the Request, testimony and evidence submitted, and the findings of fact and conclusions of law stated above, the Board hereby orders:

1. The Request in this cause is granted.

2. The 131-51 and 139-90 Orders are hereby modified to establish special 1,280-acre (or substantial equivalent combination of lots and quarter-quarter sections) drilling units for the production of oil, gas and hydrocarbons for the Upper Wasatch as defined in Findings of Fact No. 7 above, comprised of subject Sections 3 and 10 of Township 3 South, Range 2 West, and Sections 3 and 10 and 15 and 22 of Township 3 South, Range 3 West, respectively (as set forth above), and authorizing on a pilot basis, the drilling and production of up to four (4) long lateral horizontal wells upon each such drilling unit.

3. No producing interval of a horizontal lateral may be located closer than 660 feet from a boundary of said special drilling unit or laterally to another well within the special drilling unit, or 200 feet vertically to another well within the special drilling unit, without obtaining an exception location approval in accordance with Utah Admin. Code Rule R649-3-3. Should Newfield obtain evidence through the drilling of wells authorized under this order that a setback distance of less than 660 feet from drilling unit boundaries is justified and necessary to prevent waste, it may petition the Board for a modification of this order's setback distances in order to further increase the length of the permitted lateral.

4. The surface location of the authorized horizontal well not only may be anywhere upon the special drilling unit, but may also be located off the special drilling

unit presuming proper surface and sub-surface authorization for such a location has been obtained from the owners and the well will be cased and cemented to the 660-foot drilling unit set back within the special drilling unit as set forth in (3) above, both to be evidenced and satisfied by a self-certification to such effect executed by the operator of the special drilling unit and filed with the Division, and the other set backs for the wells set forth in (3) above are maintained.

5. Any horizontal well drilled pursuant to this Order may not be plugged back or recompleted to produce from any other formation other than the Upper Wasatch as defined in Findings of Fact No. 7 above, and no vertical wells located upon the Subject Lands may be perforated to produce from the Upper Wasatch as defined in Findings of Fact No. 7 above without further authorization from the Board.

6. The 131-51 Order, as modified by the 139-90 Order, and the 139-90 Order itself remain in full force and effect as to all formations covered thereby underlying the Subject Lands except as the Upper Wasatch as defined in Findings of Fact No. 7 above, including the right of the operator to drill up to four (4) wells, whether all vertical, all horizontal, or a combination of both, on each drilling unit so established to produce from said formations subject to the same limitations set forth in said Orders.

7. The special drilling units established herein are declared to be “permanent” for purposes of any authorized horizontal wells drilled thereon.

8. Within a reasonable time after analysis of the pilot program results, but in any event, not more than 13 months after entry of the Order, Newfield (or its successor operator) shall report back to the Board on the available results of the program. This reporting requirement may be met by filing a written report with the Division and Board and may require an oral report at the discretion of the Board. In addition to addressing any aspects of the pilot program results the operator deems relevant, the written report should address:

a. the appropriateness of the size of the 1,280-acre drilling units specified herein;

b. the appropriateness of the definition of the spaced interval set forth herein, whether information obtained through development has better defined the productive interval drained by the horizontal wells authorized in this Order, and whether a more limited description of the produced interval would lead to clarity should future infill horizontal wells be allowed either vertically or horizontally from the wells authorized herein;

c. the appropriateness of the four-well infill authorization specified herein (including whether additional infill wells are needed);

d. the appropriateness of the drilling unit boundary setbacks specified herein, as affected by fracture distances and orientation and observed drainage behavior (including the drainage distance beyond the terminus of the fractures);

e. the appropriateness of the inter-well distances specified herein in terms of both maximizing production and preserving the option of future secondary or tertiary recovery operations;

f. information concerning how the appropriate surface and subsurface authorizations were obtained from neighboring owners for any surface location situated outside of the drilling units as discussed in paragraph 4, above (including the self-certification information submitted to the Division pursuant to that paragraph). The Board is considering the possibility of rulemaking pertaining to notice to off-unit owners in these circumstances and would like an update on how the obtaining of necessary authorizations is actually handled under the terms of this Order;

g. any input Newfield (or its successor operator) may have concerning how the Board's operating rules as they pertain to horizontal wells might be updated and improved. Given the increase in horizontal well drilling activity in the state, the Board is presently reviewing the horizontal well drilling regulations

of other states and is considering the possibility of rulemaking to update and bring the present horizontal drilling rules more in line with modern practices; and

h. any additional input Newfield (or its successor operator) may have concerning the prevention of waste, maximization of production and the protection of correlative rights in connection with horizontal drilling matters so that future Board orders and Division oversight might be enhanced, expedited and made more efficient.

9. Pursuant to Utah Admin. Code Rules R641 and Utah Code Ann. § 63G-4-204 to 208, the Board has considered and decided this matter as a formal adjudication.

10. This Order is based exclusively on evidence of record in the adjudicative proceeding or on facts officially noted as weighed and analyzed by the Board in the exercise of its expertise as set forth in Utah Code Ann. §40-6-4(2)(a) through (e), and constitutes the signed written order stating the Board's decision and the reasons for the decision, all as required by the Administrative Procedures Act, Utah Code Ann. § 63G-4-208 and Utah Administrative Code Rule R641-109.

11. Notice re: Right to Seek Judicial Review by the Utah Supreme Court or to Request Board Reconsideration: As required by Utah Code Ann. § 63G-4-208(e) - (g), the Board hereby notifies all parties in interest that they have the right to seek judicial review of this final Board Order in this formal adjudication by filing a timely appeal with

the Utah Supreme Court within 30 days after the date that this Order issued. Utah Code Ann. §§ 63G-4-401(3)(a) and 403. As an alternative to seeking immediate judicial review, and not as a prerequisite to seeking judicial review, the Board also hereby notifies parties that they may elect to request that the Board reconsider this Order, which constitutes a final agency action of the Board. Utah Code Ann. § 63G-4-302, entitled, “Agency Review – Reconsideration,” states:

(1)(a) Within 20 days after the date that an order is issued for which review by the agency or by a superior agency under Section 63G-4-301 is unavailable, and if the order would otherwise constitute final agency action, any party may file a written request for reconsideration with the agency, stating the specific grounds upon which relief is requested.

(b) Unless otherwise provided by statute, the filing of the request is not a prerequisite for seeking judicial review of the order.

(2) The request for reconsideration shall be filed with the agency and one copy shall be sent by mail to each party by the person making the request.

(3)(a) The agency head, or a person designated for that purpose, shall issue a written order granting the request or denying the request.

(b) If the agency head or the person designated for that purpose does not issue an order within 20 days after the filing of the request, the request for reconsideration shall be considered to be denied.

Id. The Board also hereby notifies the parties that Utah Admin. Code Rule R641-110-100, which is part of a group of Board rules entitled, “Rehearing and Modification of Existing Orders,” states:

Any person affected by a final order or decision of the Board may file a petition for rehearing. Unless otherwise provided, a petition for rehearing must be filed no later than the 10th day of the month following the date of signing of the final order or decision for which the rehearing is sought. A copy of such petition will be served on each other party to the proceeding no later than the 15th day of the month.

Id. See Utah Admin. Code Rule R641-110-200 for the required contents of a petition for Rehearing. If there is any conflict between the deadline in Utah Code Ann. § 63G-4-302 and the deadline in Utah Admin. Code Rule R641-110-100 for moving to rehear this matter, the Board hereby rules that the later of the two deadlines shall be available to any party moving to rehear this matter. If the Board later denies a timely petition for rehearing, the party may still seek judicial review of the Order by perfecting a timely appeal with the Utah Supreme Court within 30 days thereafter.

The Board retains continuing jurisdiction over all the parties and over the subject matter of this cause, except to the extent said jurisdiction may be divested by the filing of a timely appeal to seek judicial review of this order by the Utah Supreme Court.

For all purposes, the Chairman's signature on a faxed copy of this Order shall be deemed the equivalent of a signed original.

DATED this 26th day of November, 2013,

**STATE OF UTAH
BOARD OF OIL, GAS AND MINING**

By: 
Ruland J. Gill, Jr., Chairman

2000.19

CERTIFICATE OF MAILING

I hereby certify that on this 27th day of November, 2013, I caused a true and Correct Copy of the foregoing **FINDINGS OF FACT, CONCLUSIONS OF LAW AND ORDER** for Docket No. 2013-028, Cause No. 139-110, to be served via Email or US Mail properly addressed with postage prepaid upon each of the following:
